Professional Summary

Software developer with practical experience in full-stack web platforms, REST APIs, and foundational LLM integrations. Proven track record implementing tool calling, structured data extraction, and role-based web applications. Combines systems fundamentals in C/C++ memory management with modern application development in Python, React, and C#.

Technical Skills

AI/Agentic

LLM API Integration, Tool Calling, Structured JSON, Prompt Engineering, MCPs, Agentic Workflows

Languages

Python, Next.js, PHP, C, C++, JavaScript, TypeScript, SQL

Backend/APIs

REST APIs, C# MinimalAPI, JSON Processing

Frontend

Next.js, React, JavaScript, TypeScript, HTML5, CSS3

Databases

PostgreSQL, MySQL, EF Core

Tools/Core

Git, Linux, OOP, Memory Management, Algorithms, Docker

Professional Experience

AI Trainer & Mentor, Department of Education and Knowledge (ADEK)

07/2026 – 08/2026

Abu Dhabi, UAE

- Delivered technical instruction on agentic workflows, prompt structuring, and autonomous tool calling for the AgenticVerse summer program.
- Mentored cohort teams building functional AI prototypes tailored to industry problem statements from ADNOC, FANR, and Khalifa Fund.
- Guided students through code debugging, API schema validation, and structured output parsing.

Software Engineering Intern, Timex IT Consulting

01/2024 – 04/2024

Abu Dhabi, UAE

- Participated in software release cycles by isolating application defects and documenting functional bugs in proprietary accounting software.
- Coordinated with developers to verify technical fixes based on defect reports before client deployment.
- Built C# MinimalAPI endpoints supporting sorting, pagination, and file handling.
- Implemented request validation and standardized HTTP response handling across CRUD services.

QA & Software Tester, 42 Abu Dhabi

01/2026

Abu Dhabi, UAE

- Tested internal student platform features for functional and UI regressions prior to deployment.
- Wrote detailed defect reproduction steps to assist core developers with debugging.

IT Support & Technical Staff, Ticketmaster

12/2025
Abu Dhabi, UAE

- Configured and deployed networked ticket-scanning hardware during high-attendance operations.
- Performed on-site hardware and connectivity troubleshooting to ensure scanning uptime.

Technical Projects

AI Appointment Scheduler

09/2026 – 10/2026

- Built and deployed a full-stack appointment scheduler with role-based access for students, faculty, and admins, using Next.js 16, TypeScript, Prisma 7, PostgreSQL + pgvector, and Auth.js.
- Implemented a RAG assistant with grounded citations and agentic tool calling: the LLM prepares bookings/cancellations, but mutations execute only through permission-checked REST APIs after explicit user confirmation, with client-supplied tool output discarded and re-executed server-side.
- Hardened and verified the system with Zod validation, per-user rate limiting, prompt-injection defenses, and 239 unit / 171 integration / 49 Playwright tests in CI, plus a Docker deployment and operations runbook.

Student-Faculty Services Platform, Al Ain University, Capstone Project

- Built a full-stack academic platform (React, PHP, MySQL) with authentication and registration, student/faculty profiles with photo upload and comments, in-app notifications, faculty availability, appointment management, and post-appointment ratings.
- Implemented the interactive systems end to end: session-guarded role-specific pages, notification creation with unread/read-state updates, ratings restricted to completed appointments.

Minishell (Unix Shell Implementation), 42 Abu Dhabi

- Developed a functional command interpreter in C supporting pipelines, environment variable expansion, and stream redirection.
- Managed process lifecycles via fork(), execve(), and signal handling routines.
- Prevented memory leaks across dynamic allocations using strict Valgrind analysis.

Education & Certifications

B.Sc. in Software Engineering, Al Ain University

09/2019 – 05/2024

Computer Science Curriculum, 42 Abu Dhabi

12/2024 – Present

MOEI × 42 Abu Dhabi AgentEra AI Hackathon Certificate

AI on Watch with Datamind – RecognAIze Hackathon Certificate
